

The intelligent choice for clinical trials.

Oncology, Immuno-oncology,
Cell & gene therapy.

Where technology meets expertise

cmedresearch.com

Cmed is an oncology focused CRO developed to fit your needs perfectly.

We are a well-established, full service CRO, with experienced people and advanced technology for clinical data management.

We specialize in applying both skills and technology to deliver well-managed trials in oncology, immuno-oncology, cell and gene therapy and other specialty therapeutics.

Our services

- Full services or functional services
- Strategy, IND, Protocol design and development
- Feasibility, start-up, clinical operations, and monitoring
- Medical, safety, and PVG
- Data and analytics
- Encapsia – the only holistic clinical data platform

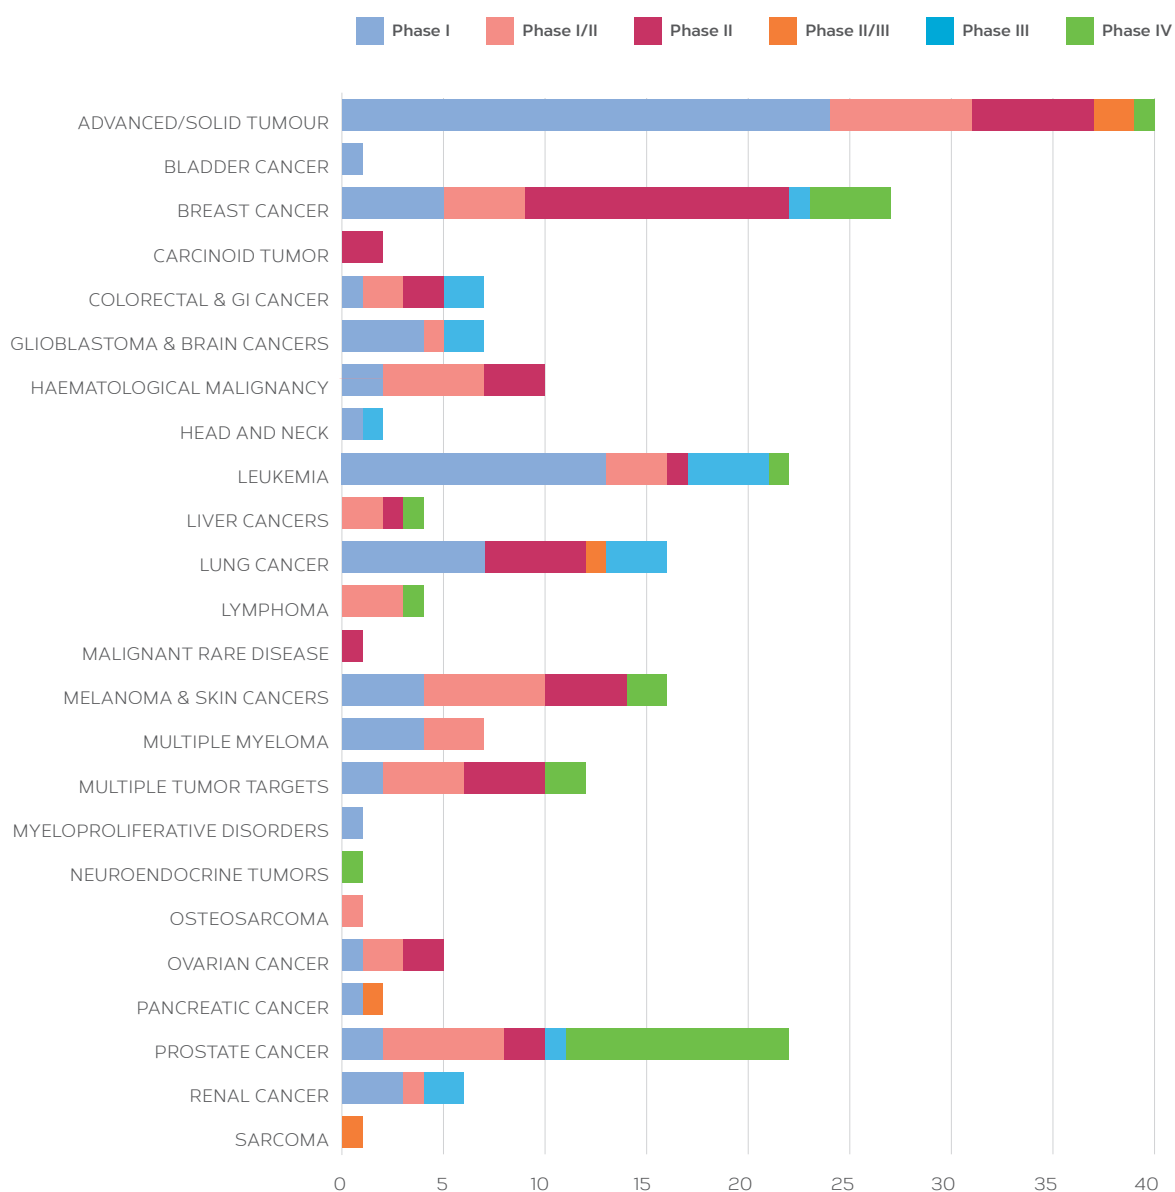

Cmed is valued by biotech and pharma companies because of our:

- Flexible, responsive, proactive and collaborative approach, vital for smaller biopharma
- Breadth and depth of experience in data and analytics to manage the complex data from today's trial
- Ability to provide the sites and patients needed for studies with a network of offices in the US and Western and Eastern Europe
- Staff and partners in 48 countries around the world

Specialist expertise and experience.

Our primary therapeutic experience is in oncology and includes various hematological indications such as leukemia, lymphoma, and multiple myeloma, as well as solid tumor indications including breast, lung, prostate, colorectal, glioblastoma multiforme, melanoma, ovarian and renal cell carcinoma.

Oncology experience

Achieving success with oncology and other complex therapies requires a deeper level of understanding across multiple disciplines. As a client of Cmed you will have access to our experts with deep experience of oncology and hematology trials.

Our experience includes:

46,000
PATIENTS ENROLLED
GLOBALLY

250+
ONCOLOGY STUDIES
DELIVERED

4,400
INVESTIGATIVE
SITES GLOBALLY

47
CELL & GENE
THERAPY TRIALS

COMPLEX TRIAL DESIGN
INCLUDING FIRST IN HUMAN
BASKET, ADAPTIVE AND
ACCELERATED COHORTS

Phase
I

Phase i through to
global phase iv programs

PHASE
IV

Extensive oncology expertise across medical, scientific, regulatory, and operational teams:

100%

Staff have
oncology experience

25%

Clinical studies in
oncology have been
in hematological cancers

75%

Clinical studies in
oncology have been in a
variety of solid tumors

We have experience with a broad range of immunotherapies including checkpoint inhibitors, monoclonal antibodies, bispecifics, CAR-T cells, gene therapy, stem cell transplant, oncolytic viruses as well as small molecules and radiotherapies.

Our teams have experience in many additional oncology indications and therapies.

From concept to patient, execute innovation in your oncology trials with Cmed

Cmed utilise encapsia – the most advanced data capture and visualisation tool to give you better visibility of all your trial data to help you make quicker decisions in your oncology trials.

Cmed uses encapsia in oncology and other complex studies for its clear benefits, such as immediacy of data visualizations, complex insights, and the ability to take actions on your data with more immediacy than with traditional systems.

For example, in CAR-T cell studies where toxicity is a concern, encapsia provides immediate and sophisticated insights of data including live patient profiles plus cell and biomarker data as soon as results become available from labs. With live, interactive, and actionable insights, encapsia is a valuable tool to manage toxicity, helping you meet your obligations for patient safety.

Using encapsia, Cmed can enable faster and more informed decisions in your clinical trials

- Live, actionable insights with real-time access to all data, including third party data
- Quick to identify, query, and comment on outlier data points
- Immediate and complex validity checks on data points as they are recorded
- Direct data capture (DDC) for instant availability of subject data
- Use any mix of DDC, EDC, and third party data uploads within the same site or study
- Rapid builds and extracts to ensure data is available for repeated interim data reviews

Monitor and control your study with live and interactive data visualizations and dashboards

Insights in encapsia are more than data visualizations: they are interactive and allow you to take immediate actions within the system. For example, you can click on a data point within a chart to see the relevant eCRF page.

In addition, you can highlight data, share comments and agree on actions with your colleagues

Cmed Offers

FULL SERVICE OF FUNCTIONAL SERVICES

STRATEGY, IND, PROTOCOL DESIGN AND DEVELOPMENT

FEASIBILITY, START-UP, CLINICAL OPERATIONS AND MONITORING

MEDICAL, SAFETY, AND PVG

DATA AND ANALYTICS

Encapsia – powerful and holistic platform

“Compliments go out to the team, your organization allows for a hassle free experience every time. It is great to have such a strong relationship with a fully trusted partner, thank you for all of your help and expertise. Looking forward to working with you through the last year of the trial and into the future.”
